

# AI CBP Tool — How to Use Guide

A complete walkthrough for generating, reviewing, and rolling out your department's Capacity Building Plan.

## Step-by-Step Walkthrough

### 01 Login to the Platform

- Open the iGOT-AI CBP Tool in your browser (<https://portal.igotkarmayogi.gov.in/training-pla-ai/#/> ).
- Enter the credentials shared by your PC & AM.
- Hit **Login** to land on your dashboard.

### 02 Select Ministry / Department

- Pick whether your organisation is **Centre** or **State**.
- Choose your State Name, then pick the Department from the dropdown.
- Tap "**Manage Documents**" to move ahead.

### 03 Manage Relevant Documents

- Upload the mandatory **Work Allocation Order**. A live badge shows your progress.
- Add optional supporting docs like **Annual Reports** or **Other Supporting Documents** to improve accuracy.
- Download **Sample Formats** to prepare your files before uploading.
- Click "**Upload Document**", pick the document type, then drag-and-drop or browse your PDF.
- Easily **download**, **preview**, or **delete** any file from the table. You can also search by name or type.
- Up to **10 PDFs**, each under **25 MB**.
- Mandatory documents should be uploaded first for the best CBP results.
- Watch the AI summary status change: Pending → In Progress → Completed.

⚠ Upload only official, publicly available, text-searchable PDFs. Please avoid confidential files.

The screenshot shows the 'CBP Document Library' interface. At the top, there are logos for the Department of Personnel & Training, Capacity Building Commission, and Karmayogi Bharat. A navigation bar includes 'How to use', 'Dashboard', and a user profile icon. Below the navigation bar, there's a 'Back to Role Mapping Generation' link. The main heading is 'CBP Document Library' with a sub-heading 'Ministry of Road Transport and Highways (MoRTH) / National Highways Authority of India (NHAI)' and an 'Edit' button. On the right, there are buttons for 'Sample Format' and 'Upload Document'. Below this, a section titled 'Uploaded Documents (Max. 10 Documents are allowed)' contains a search bar. A table lists the uploaded documents:

| Document            | Document Type  | Summary Status | Date        | Actions                       |
|---------------------|----------------|----------------|-------------|-------------------------------|
| Directory _ WCD.pdf | Other Document | Completed      | Jan 3, 2026 | [Download] [Preview] [Delete] |

At the bottom right, there are pagination controls: 'Items per page: 5' and '1 - 1 of 1'.

The screenshot shows a modal window titled 'Download Sample Document'. It contains the following content:

- A close button (X) in the top right corner.
- A message: 'Use these sample templates as a reference for preparing your designation & role mapping document.'
- Two download links:
  - 'Sample Work Allocation order structure .docx - Editable template' with a download icon.
  - 'Sample work allocation order document .pdf - Reference format' with a download icon.
- A note in a yellow box: 'Note: Please make sure the uploadable document is in PDF format only. Maximum file size: 25 MB.'
- A 'Close' button at the bottom right.

## 04 Generate CBP — Initial Draft

- The tool reads all **designations** from your uploaded Work Allocation Order.
- **Work Allocation Order is mandatory** for CBP generation — without it, the Generate CBP action will be disabled.
- Each designation is automatically matched with the **iGOT Designation Master**.
- Matches land in the **Matched Role Mapping** tab with a live count.
- Unmatched ones go to the **Unmatched Role Mapping** tab for your review.
- Roles and competencies are mapped using the **KCM framework**, and your **Initial Draft CBP** is ready.

### View Existing CBP

If you've already generated a CBP earlier, clicking Generate CBP opens a pop-up with a View Existing CBP button — tap it to access the last generated CBP. If you click Yes instead, a new CBP generation kicks off and the previous data will be overwritten.

Think of the AI draft as a starting point — always double-check matched and unmatched mappings

## 05 Manage Unmatched Role Mapping

- Head to the **Unmatched Role Mapping** tab to see designations the AI couldn't auto-match.
- Tap the **3-dot menu** on a row and choose **"Edit Role Mapping"**.
- Pick the correct designation from the **iGOT Designation Master** dropdown, then tap **Add** and **Update**.
- Once saved, that row **moves automatically** from Unmatched to **Matched Role Mapping**, and the count updates right away.

Fixing unmatched mappings boosts your CBP accuracy and unlocks the View Final CBP and Send for Approval buttons.

## 06 Request to Add New Designation in iGOT Master

- If a designation simply doesn't exist in the iGOT Master, request to add it instead of forcing a match.
- From the **Unmatched Role Mapping** section, select the designation and tap **"Send Designation Approval"**.
- Your request goes straight to **SPV Admins** with an automatic email alert.
- The SPV Admin reviews and either approves it or rejects it with a reason.
- On approval, the new designation joins the **iGOT Designation Master** and its row shifts to **Matched Role Mapping** automatically.

Track the status anytime under Unmatched role mapping. You'll also get an email once the SPV takes action.

- Tap the **Profile** icon at the top-right.
- Choose "**Update Designation Hierarchy**".
- Rearrange the hierarchy using the dropdowns as needed.

The screenshot displays the iGOT Designation Master interface for the Ministry of Road Transport and Highways (MoRTH) / National Highways Authority of India (NHA). The main table lists designations with their roles, activities, and competencies. The 'Update Designation Hierarchy' sidebar on the right allows for selecting a hierarchy for each designation.

| Designation                                                                                              | Role & Responsibilities                                                                                                                                                                                                                  | Activities                                                                                                                                                                                                               | Behavioral Competencies                                                                                                                                            | Functional Competencies                                                                                                                                                                                                                                 |

## 08 Add New Designations from iGOT Designation Master

- If the AI missed any designations, manually add them from the **iGOT Designation Master** by clicking on **Add More Designation** CTA from the role mapping page.
- Fill in **roles, responsibilities, and details** for each one.
- Tap **Save** after each addition.
- The system will generate role mappings for the newly added designations too.

The screenshot shows the 'Add New Designation' modal in the iGOT Designation Master. The modal allows adding a new designation with a search bar and a list of suggestions.

**Add New Designation**

Maximum 10 designations can be selected for CBP generation at one time. 2/10

1. Additional Controller of Accounts  
sdghgf

**Designation 2**

Select designation

Search designation

- Additional Controller of Finance
- Additional Departmental Enquiry Commissioner
- Additional Deputy Collector
- Aeronautical Officer
- Agricultural Engineer
- Agriculture Commissioner

Buttons: Add More, Edit, Delete

## 09 Edit the CBP

- Use the built-in editor for **manual edits** — tweak designations, responsibilities, wings, or divisions.
- Update **Behavioural** and **Functional Competencies** to align with KCM.

- Fine-tune **Domain Competencies** to fit the role.
- Tap **Save CBP** when you're happy.

## 10 Generate Course Recommendations

- Open a Role Mapping and tap **"Generate Course Recommendation"**, or use the **3-dot menu** on any row.
- The tool suggests the best-fit courses from the **iGOT Course Catalogue / iGOT Platform**, tailored to the role's competency gaps.
- Use **filters** (Competencies, Ratings, Language, Duration, Provider) or **search** to narrow the list.
- **Verify each course** by clicking on its name to open and review it on the **iGOT platform** before adding it to the plan.
- Under **"Add More Courses from iGOT"**, browse the full course list to grab any relevant ones the AI missed — then add them to your recommendations.
- Tick the checkboxes for your chosen courses and tap **"Save Courses"** to finalise the recommendation for that role.

Blend AI suggestions with your own hand-picked courses from iGOT for a well-rounded learning plan.

## 11 Send Role Mappings for Approval

- Tick the checkbox next to each role mapping you want to submit — the checkbox only appears once you've saved the course recommendations for that designation.
- The "Send for Approval" button wakes up and shows a live count of how many you've picked (for example, **Send for Approval (3)**).
- Hit the button, choose the **MDO Admin or Leader** who will review it, give your request a clear **Request Name**, and tap **Submit**.
- A **unique Request ID** is generated instantly — jot it down or note it somewhere safe. Status starts as **Pending Approval**.

Once you hit Submit, those role mappings lock for editing — so give everything a final once-over before sending.

## 12 Track Your Role Mapping Approval Requests

- Open the **Approval Requests** page from your **Profile / User Icon** menu.
- Spot your request by its **Request ID** or use **search and filters** to narrow things down quickly.
- Check the **status badge** to know where things stand — **Pending** (yellow), **Approved & Published** (green), or **Rejected** (red).
- Tap **View** to peek into the full details of the submitted role mappings and course recommendations.
- Changed your mind? You can **Revoke** a request while it's still pending, which unlocks those role mappings for editing again.

Statuses update in real time after MDO action — refresh the page if you don't see the latest badge.

### 13 View & Download Course List

- Tap **"View Course Recommendation"** to see the full list.
- Remove any course using the **Delete icon**.
- Export the list as a **PDF** with the Download button.

## 14 Download Combined CBP & Courses

- Tap **"View Final CBP"** to review all role mappings along with their courses.
- Export in **PDF** or **CSV** format.

## 15 Download in Multiple Languages

- In the View Final CBP pop-up, open the **Language dropdown**.
- Pick your preferred language and download.

## 16 Finalize & Download CBP

- Download the **Final CBP** with all designations and competency mappings.
- Grab the **Final Course Recommendations** alongside it.
- Save as **PDF** for records and official submission.

Make sure your Competent Authority reviews and clears everything before you submit.

## 17 Review Role Mapping Approval Requests (MDO Portal)- For MDO Admin/Leader

- MDO Admin/Leader needs Log in to the **MDO Admin Portal**
- From the left-hand navigation, click "**AI CBP Requests**" to open the role mapping approval queue.
- The **Approval Requests** dashboard opens — every role mapping submission from your MDO Nodal Officer is listed here with its **Request ID**, **Request Name**, **Submitted By**, **Submitted On**, and live **Status** badge.
- Use the **search bar** or **status filters** (Pending / Approved / Rejected) to quickly find a request.
- Tap **View** on any pending request to open the full review screen — you'll see all submitted role mappings, mapped competencies, and the linked course recommendations side-by-side.
- For each role mapping, choose one of two actions:
  1. **Approve** — pick a **Training Plan** and set a **Target Completion Date**, then confirm. The mapping is marked **Approved & Published** to iGOT.
  2. **Reject** — enter a **mandatory rejection reason** so the Nodal Officer knows what to fix before resubmitting.

### View Non Matching Designations

Tap "View Non Matching Designations" at the top-right to see the list of designations the Nodal Officer flagged as unmatched, along with their SPV approval status — handy context before approving or rejecting the bundle.

Both Approve and Reject actions trigger an automatic email back to the Nodal Officer, and the request status updates instantly on their Approval Requests page.

The screenshot displays the 'MDO portal' interface. At the top, there's a search bar and navigation icons. The main section is titled 'Approval Requests' and includes a 'View Non Matching Designation' button. Below this, there's a filter section with a search bar and dropdowns for 'All Status' and 'All Time'. A table lists the requests:

| Request ID                           | Request Name                     | Requestor          | Department | Request Status | Date and Time         | No of Designations |
|--------------------------------------|----------------------------------|--------------------|------------|----------------|-----------------------|--------------------|
| b84acc70-95c3-43a1-8e3e-c4e629a77e5d | Testing MDO Role mapping request | vishnu@tarento.com | N/A        | Approved       | 16 May 2026, 04:38 PM | 1                  |

At the bottom right of the table, it says 'Items per page: 20' and '1 - 1 of 1'.

The screenshot shows the MDO portal interface. The top navigation bar includes the logo, 'MDO portal', a search bar, and user icons. The left sidebar lists navigation options: Home, Organization Directory, Users, Onboarding, All users, Approval, Mentors, Roles and access, Custom Fields, Organization Setting, Content Management, Peer Validation, Events, and Community.

The main content area is titled 'Review Request' and shows a request for 'Assistant (S&T)' in the 'Dept of Project Management' division. The request was submitted by 'vishnu@tarento.com' on 'Jun 16, 2026 02:04:55 PM'. The status is 'Pending'. Action buttons include 'Approve & Publish' and 'Reject Request'.

The 'Request Details' section shows the request name, submitted by, submitted on, and number of designations (2).

The 'Role Mappings for Review' section displays a table with columns: Designation, Role & Responsibilities, Activities, Behavioral Competencies, Functional Competencies, Domain Competencies, and Action. The table lists various competencies for the 'Assistant (S&T)' role.

An 'Approve & Publish Plan' modal dialog is open, prompting the user to enter plan details. It includes fields for 'Name of Plan' (with a character count of 0/70) and 'Timeline (Due Date)' (with a calendar icon). The modal has 'Cancel' and 'Approve & Publish' buttons.

## 18 Approve New Designation Requests (SPV Portal) -For SPV Admins

- Log in to the **SPV Admin Portal** and open **Manage Designation Approval Requests**.
- Switch between the **Pending**, **Approved**, and **Rejected** tabs — each shows a live count of requests.
- Narrow the list using the **search**, **Division/Wing** filter (Apex / Directorate / District / Block / Field), or the **Organisation** filter.
- Every row shows the **Created On**, **Designation Name**, **Organisation**, **Division**, **Requested By**, and **Email**.
- For a pending request, choose:

1. **Approve** (green tick) — the new designation is added to the **iGOT Designation Master** and the unmatched row in the requester's portal moves into **Matched Role Mapping**.
2. **Reject** (red cross) — capture a clear reason so the MDO knows why and can re-submit if needed.

Only SPV Admins can take action here. Approvals and rejections are logged with timestamp and reviewer, and the requester is notified by email automatically.

Confirmation

Are you sure you want to approve this request.

## DOs & DON'Ts

### ✓ Always Do These

- Upload only official, publicly available PDFs — keep each file under 25 MB.
- Guard your login credentials and never share them with anyone.
- Treat AI-generated CBP drafts as a starting point — always review and refine them.
- Blend AI-suggested courses with your own hand-picked ones from iGOT for the best learning mix.
- Make sure every competency you add aligns with the KCM framework.
- Save and securely store your final CBP and course recommendations once you're done.
- Double-check everything before hitting Send for Approval — once submitted, those role mappings lock for editing.

### ⊘ Never Do These

- Never upload confidential, classified, or sensitive documents.
- Don't treat AI outputs as final — always get your Competent Authority to review and clear them.
- Avoid adding competencies that fall outside KCM without proper approval.
- Never share your login credentials with colleagues or external users.
- Don't upload files that are too large, corrupted, or not text-searchable.

## Next Steps

1. Pull together all your documents — guidelines, toolkits, annual reports, and Work Allocation Orders — before you start.
2. Generate your department-wise CBP, review every mapping carefully, and get formal sign-off from your Competent Authority.
3. Roll out the approved CBP by creating and assigning designation-wise MyiGOT training plans for your team.

4. Identify any remaining competency gaps and plan new course development to fill them.
